# Priya Raja

AI Engineer | Building Agentic AI & RAG Systems | Ex-Full Stack  
Developer (MERN) | Python, LangChain, OpenAI  
Dubai, United Arab Emirates

## Summary

AI Engineer specializing in RAG pipelines and agentic AI systems.

Transitioning from 5+ years of Full Stack Engineering (MERN) to AI/  
ML.

My full-stack background gives me an edge in building end-to-end  
AI  
products that actually ship.

Current focus:

RAG systems with vector databases (FAISS, ChromaDB)

Multi-agent architectures with LangChain

# FastAPI backends for AI applications

LLM integration (OpenAI, Gemini, Anthropic)

MLOps: Model deployment, monitoring, CI/CD for AI systems

Tech Stack:

AI/ML: Python | LangChain | FastAPI | FAISS | OpenAI API | RAG  
Pipelines

MLOps: Docker | GitHub Actions | CI/CD | Model Versioning | API  
Deployment | AWS

Full Stack: React | Next.js | PostgreSQL | MongoDB

## Experience

EXCELLENCE DRIVING

Frontend Developer

January 2023 - September 2025 (2 years 9 months)

Dubai, United Arab Emirates

Developed SEO-optimized promotional pages and blogs using Next.js & Strapi CMS, boosting website

traffic by 45% and engagement by 30%.

- Built 20+ responsive UI components with Bootstrap, improving cross-platform compatibility and reducing defects by 25%.

- Integrated Strapi CMS for dynamic content, reducing marketing team's update time by 50%.

- Implemented 10+ new features in React + Nest.js admin portal, reducing manual reporting efforts by 40%.

- Implemented security features including CSP policies, XSS protection, and CAPTCHA validation, safeguarding sensitive user data, preventing automated bot signups, and strengthening overall application security.

## e-Zest Solutions

### Software Developer

February 2021 - December 2022 (1 year 11 months)

Pune, Maharashtra, India

#### Supply Chain Maturity Model:

- \* Built interactive D3.js map data visualizations for 30+ countries' supply chain metrics.

- \* Delivered a B2C app with React + Redux Toolkit + Material UI, ensuring accessibility and international coding standards.

- WHO – Country Portal:

- \* Implemented internationalization (i18n) in 5 languages with React + ANT Design, expanding product reach globally.

- \* Built Excel data validation feature using the xlsx package, reducing submission errors by 70%.

- \* Delivered responsive, accessible UI components following ANT Design system principles.

- \* Increased code reliability by 35% with Jest unit tests.

## Addteq

### Junior Software Developer

December 2012 - January 2014 (1 year 2 months)

Migrated websites from static to dynamic using jQuery and HTML templates, reducing content update

time significantly.

- Automated tasks using Groovy Script, boosting developer productivity by 20%.
- Worked on Atlassian products (Jira, Confluence, Bitbucket) for enterprise collaboration.

---

## Education

G.H.Raisoni Institute of Engg and technology

B.E, Information Technology · (2008 - 2012)
